

FRONT PORCH & INFOR

We are excited to announce the implementation of Infor, a cloud based business platform. Our goal is to empower you with tools that are simple, efficient, and connected to your teammates across our organization.

IMAGINE...

- **Purchasing and invoice payments go online!** Review, order, and check the status of your purchases and automatically have invoices flow through for payment, all from one app.
- The **same great paperless online experience employees are used to** for timekeeping, PTO requests, online benefits enrollment and more.
- And for managers, online access to human resources, payroll, financial and purchasing **dashboards with up to the minute information**, all in one place!

WHAT'S IN IT FOR YOU?

- We are **joining** many of the systems across Front Porch, so they are **better connected** and more convenient for each of you.
- You will spend **less time** signing into **systems** and searching for information, allowing more time to **better serve** our residents, clients and communities.
- Access to real time data enables you to make **faster and more informed** decisions.
- You can submit requests on **one single platform** and view results **anywhere, anytime on any device**.

Human Resources

Timekeeping & Payroll

Finance

Purchasing & Contracts

Analytics

We're working to do all of this and more starting in **Summer 2022!**
