Subject: Introducing Infor - An Exciting New Tool is Coming!
Date: Tuesday, February 22, 2022 9:18:01 AM
Attachments: [Introducing Infor.pdf](#)
Importance: High

We're excited to announce the upcoming implementation of [Infor](#), which is a cloud-based business system for accounting, purchasing, payroll and human resources. We will begin deploying Infor across Front Porch starting in Summer 2022. The new solution will help us continue our efforts to:

- eliminate paper and automate common tasks
- offer more online self-service options to managers and employees
- provide real time information anywhere, any time, on any device

Why We Are Implementing Infor

Our most valuable asset is our people, and our #1 goal is to improve the employee and customer experience. Better tools and timely information empower us to improve the way we work, enhance our connections with each other, and better meet the needs of current and future residents, clients and staff. Infor will allow us to streamline our core business systems from three accounting systems and two payroll systems into one unified state of the art integrated business platform.

Please take a look at the attached flyer to learn more!

Next Steps

- More information of what's changing for our employees and managers will be shared over the next few months
- Learning opportunities will be provided and tailored to your specific role and how you will interact with the Infor system

Contact Us!

We encourage you to ask questions and give us constructive feedback along the way about what we can do to make this transition easier for you. Please contact us with questions at infor@frontporch.net and continue to look for further communication about Infor in the near future.

Thank you for helping us make this transition; and fulfilling our shared vision to empower individuals to live connected and fulfilled lives through community and innovation. Your leadership and support are critical to our success!
